

KATIE EARY BIOGRAPHY

London based menswear designer Katie Eary graduated from the RCA in 2008 with an MA in Menswear. Selfridges flagship store commissioned her in September 2008, for which she created 9 body/head pieces for their LFW window display. The same month Kate Moss donned a number of Eary pieces for Testino's shoot for Vogue UK and Roisin Murphy borrowed Eary's gold Swarovski coat on tour with her, wearing it night-in night-out for her opening extravaganza.

This will be her second show at London Fashion Week when she presents her SS/10 collection in September with MAN. This season Katie divulges the inner decay of the addict - baring souls and digging up skeletons in the closet, self-loathing, seedy underworld, depraved sexuality, rent-boys, docklands pick-ups, beautiful boys become addicted, porcelain faces but inner decay spreading addiction through beauty.
