

KTZ Biography

Sasko Bezovski (born 10.12.1968, Skopje, Macedonia) trained to become an architect and a building standards engineer, before moving to the UK in 1989, to pursue his interest in music and other creative disciplines at the age of 20. 1996 saw the opening of his first boutique Kokon to Zai, originally designed as a space for creatives and DJs to hang out. The store soon gained a cult status and a second store in Paris followed suit.

The stores were the starting point to the development of the KTZ label and 3 years ago, the label was conceived to fill a gap in the market for accessible, democratic, highly creative and unique fashion and it has been going from strength to strength. It is now stocked in Topshop, ASOS and Dover Street Market.

The label's signature pieces consist of intricate workmanship and high energy prints mixed with individualist shapes.
